EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science

Bachelor of Science in Computer Science, Dean's List

Expected May 2026

Relevant Coursework: Intelligent Robotics, Computer Networks, Operating Systems, Machine Learning, Data Structures

TECHNICAL SKILLS

Programming Languages: JavaScript, C++, Python, PHP, PostgreSQL

Tools: Vue, React, React Native, Express, MongoDB, Node, Git, jQuery, Google Cloud, REST, Firebase, Docker, Agile

Spoken Languages: English, Urdu/Punjabi (Native)

PROFESSIONAL EXPERIENCE

Yaqoob Electronics, Developer Intern

December 2025 - February 2026

- Designed and deployed **12+ core feature sets** for an accounting platform serving **2,000+ customers**, including a new supplier management module and "discontinued" item tracking to maintain historical data integrity
- Refactored profit calculation logic to resolve discrepancies across **15,000+ historical entries**, ensuring 100% financial accuracy by implementing FIFO (First-In, First-Out) batch-sales logic and creating financial reports to summarize sales
- Engineered an automated stock synchronization system** and return-item workflow that dynamically updates inventory levels to reflect real-time availability and true profit margins

Unadat, Software Engineer Intern

February 2024 - April 2024

- Automated deployment and minimized manual tasks, **reducing development downtime** from **90 seconds to 6 seconds**
- Created a new goals and milestones page, enhancing the front-end UI so that users can track their financial goals easily
- Employed **agile methodologies** and used Jira to manage tasks across five teams, ensuring efficient communication and seamless integration of code changes across teams

PROJECT EXPERIENCE

Forkcast, Full Stack Project

August 2025-December 2025

- Created a feature rich web app using **React, Postgresql** and **Express** to help users find recipes to lead a healthier lifestyle
- Key features include recipe lookup, grocery list, macro tracker & daily journal to reflect on food choices during the week
- Users are able to **interact with other user's** uploaded recipes, **like, comment, and share recipes** with others
- Student-centered accounts** helped students track what they ate at the school's dining halls and track their spending

PillPal, Won Best Use of Google Cloud at SBUHacks

February 2024

- Developed a **MERN** stack mobile app (MongoDB, Express, React Native, Node.js) to assist users with medication management, inspired by the challenges faced by elderly and non-English-speaking family members
- Integrated **Google Cloud Vision API** to allow users to **scan prescription bottles with their phone**, simplifying medication management by providing personalized advice based on medical history
- Designed an accessible UI with **support for 10+ languages** and large icons, and **integrated Google Cloud Text-to-Speech and OpenAI's ChatGPT 3.5 APIs** to provide personalized, audio-based medication advice

Anchor, Chrome Web Extension at HackPrinceton

November 2023

- Collaborated on a **Chrome Web Extension** using a **pomodoro** methodology to **improve user productivity and focus**
- Integrated **OpenAI** to automatically generate subtasks and actionable steps, creating a dynamic checklist to help users combat low attention spans
- Implemented a task-specific "focus" feature, **blocking irrelevant tabs** and content to keep users focused on their designated tasks, addressing real-world productivity challenges faced by students

LEADERSHIP EXPERIENCE

MSA, Interfaith Chair

May 2025 - May 2026

- Fostered an inclusive campus environment by actively representing the MSA's perspective in various cross-cultural forums including the interfaith radio show

Computer Science Club at Hunter College, Vice President

August 2023 - May 2024

- Founded and developed a community for computer science students** by leading technical workshops, sharing internship opportunities, and facilitating networking events to help students develop their professional skills
